Dr Kunle Aluko "I totally enjoyed the EUMAA course with Raman. With so many varieties of cases, he made me believe so much in the possibilities of the Invisalign system in the hands of the experienced. I am so motivated to start cases and build my portfolio. So glad I signed up."

Dr Kasper Lindh, Denmark "The course indeed met my expectations! The whole course from beginning to end was amazing! This EUMAA Masters course really put everything in perspective for me. A nicely balanced curriculum with a combination of hands on and high level of theory, made it all worth the cost. I now not only have the knowledge, but also the confidence to boost my career with Invisalign. Thanks to Dr. Raman and his staff for providing me this breakthrough!"

Dr Darren Hand from Dean Road Orthodontics commented: "The course (5th, 6th, 7th October) was extremely well structured and informative, although I suspect that I may require the additional support through the early stages of providing the treatment"

Dr Romana Czemko The Masters of Aligners course was well structured, useful and very relevant. The course tutor Dr Raman was a true professional with a wealth of knowledge to impart; theoretical and practical. It has been a pleasure working with him and I can honestly say I completed the course with great knowledge about the Invisalign system. The course was well worth the investment and time. If you want to deepen your knowledge about Invisalign or are a beginner the course is perfect for you.

Dr Amit Coonar I would highly recommend the EUMAA course. It is well structured, with very detailed content. Raman and his team are great presenters. I thoroughly enjoyed course. Overall, it was very well delivered.

Dr Martin Van Rensburg Excellent course reinforcing the principles of orthodontic mechanics and its detailed application in the Invisalign treatment system.

Dr Nerina Hendrickse The seminars are very informative. Working through real cases on ClinCheck is a brilliant learning environment.

Dr Cathie Barrs I have been impressed with the way Raman has taken the course. He has a relaxed and competent style. Full of relevant information and excellent clinical tips. As an experienced practitioner I have found some of the course content a repetition of previous knowledge. However, it is always useful to review your technique and refine your skills with an added bonus of Raman's Clinical Pearls and expertise. Raman has been happy to adjust the course content to suit the participants which is excellent. I like working in small groups reviewing cases together and learning from others experience. The recent ClinCheck sessions have been excellent. I feel that the inXdepth training in ClinCheck for me has been invaluable and I am looking forward to the next meeting. Invisalign is a simple system for the patient which requires a high level of knowledge of the complex treatment options from the Specialist provider to achieve the high quality result for the patient. Raman's ability to transmit this knowledge along with guest speakers has achieved the course aims.

Dr Michael Linehan A fabulous and entertaining course, brilliantly led by Raman Aulakh. He puts enjoyment back into learning. The course was full of encouragement. Wondering why I didn't do it sooner.

Dr Katerina Rousea I would like to say many thanks to Raman and everyone else who helped make last weekend's EUMAA exceptional course a reality. The course was expectedly intensive but very efficiently structured, to the point and with numerous handy clinical tips on offer. I really appreciated Raman's great teaching style and his willingness to share his knowledge. His confidence in the Invisalign system is definitely contagious. I, like the rest of the delegates, am still buzzing from excitement about the mind blowing possibilities and the continuous refinement of the Invisalign system.

The course pays for itself:

2 Invisalign treatment starts cover the entire cost of the EUMAA Programme

The average number of case starts achieved by EUMAA candidates is 15 in the first year

INTENSIVE Masters in clear aligner therapy

The European Masters of Aligners (EUMAA) is a 5 module course led by Specialist Orthodontist Raman Aulakh and recognised by Align Technology which provides delegates with official certification on completion.

The course is specifically designed for Orthodontists who are Invisalign certified but have not had the opportunity to work on any recent Invisalign cases.

EUMAA runs over 3 consecutive days and 1 Study Club day. The course offers a blend of theory and hands-on sessions and gives delegates **access to an online educational platform and dedicated mentoring** to address questions regarding clinical cases and ClinCheck treatment plans.

Orthodontists will also benefit **from specially negotiated rates with companies in the dental industry**, for products and services ranging from equipment to consumable items which make treating with Invisalign as effective as possible.

Fresh? This advanced Invisalign programme will benefit doctors new to the Invisalign system. It offers the chance to upskill and progress to the next level of digital orthodontics.

Fresh start? This programme is also valuable for doctors already trained to treat with the Invisalign system, but who may not have had a recent case start. Those keen to recertify can optimise existing skills, adopt the latest treatment protocols, advances in ClinCheck and digital scanning technology.

Time poor but ambitious? Instead of regular study clubs, EUMMA delegates only need three intensive days to become confident enough to treat patients using the Invisalign system. Graduates leave at the top of their game, self-reliant, yet supported, to grow their practices with an Invisalign focus. So much so that the average newly certified doctors carries out 15 treatments in the first year.

Receive:

- A flat 20% Invisalign system discount for a 12 month period
- This is applicable to all Invisalign training courses

INTENSIVE Masters in clear aligner therapy

Invisalign Masters courses + Study Club	Location
29 th 30 th November 1 st December 2018	London
